LOCATION Nigeria

CORE COMPETENCIES

- GitHub, GitLab, CI/CD workflows
- Docker, Webpack, npm, yarn
- React (TypeScript), Material UI
- Internationalization (react-intl)
- Java (Spring Boot, Spring Web, JPA)
- Node.js / Express
- Ruby on Rails, Python (Django)
- AI development: FastAPI, LangChain, LangGraph
- REST APIs, OAuth2, OpenID Connect
- AWS, performance tuning, deployment
- Bootstrap, PHP, MySQL, Drupal
- Unit & regression testing, code reviews

EDUCATION

BSc Computer Science

University of Jos, Nigeria · 2012 – 2016

CERTIFICATION

Hatchways Career Accelerator

Full-Stack Program · Aug – Oct 2021

PROFESSIONAL PROFILE

Dedicated full-stack developer with 4+ years of production programming experience, including 2 years as a backend Java/Spring Boot engineer supporting and extending enterprise systems. Skilled in designing and consuming reliable APIs and in building polished React/TypeScript front ends, with working knowledge of AI development using FastAPI, LangChain, and LangGraph. Graduate of the Hatchways Career Accelerator Full-Stack Training Program (simulated Agile team environment). Experienced with Figma and Adobe XD for UI/UX.

PROFESSIONAL EXPERIENCE

Java Spring Boot / React Developer

Jan 2024 – Present

Data.FI, Palladium International – Abuja, Nigeria

- Enhanced the company's EMR (LAMISPlus) UI using React (TypeScript), Material UI, and supporting libraries.
- Designed and developed RESTful web services with Java Spring Boot.
- Implemented robust client- and server-side input validation using Yup and `javax.validation`.
- Authored unit and regression tests to keep critical flows reliable as the system evolved.
- Conducted web service tuning and performance testing to optimize system efficiency.
- Contributed to technical strategy, solution architecture, and design across multiple technologies.
- Managed complex form state with Formik for consistent, predictable UX.
- Refactored UI code to remove redundancy and improve maintainability.
- Participated actively in code reviews, providing and receiving constructive feedback.
- Applied software design patterns to deliver scalable, enterprise-level solutions.

React / TypeScript Developer (Remote)

Mar 2023 – Sep 2023

Logbookie.eu – Praha, Czech Republic

- Enhanced the company's mobile site UI using React (TypeScript) and Material UI.
- Refactored multiple codebases to improve maintainability and performance in pre-existing projects.
- Implemented list virtualization with `react-virtualized` for efficient rendering of large datasets.
- Applied `react-intl` for internationalization, including Czech-to-English translations.
- Integrated `Axios` to consume company APIs and streamline data handling across features.
- Managed complex form states (edit profile, login, password recovery) with Formik.
- Developed a `ProtectedRoute` component to enforce client-side authentication.
- Built token-renewal functionality to refresh user sessions securely.

PORTFOLIO PROJECTS

WhisperBox – E2EE chat with Web Crypto API (RSA-OAEP + AES-GCM). [live ↗](#) [code ↗](#)

Invoice Manager – Offline-first invoicing with IndexedDB persistence. [live ↗](#) [code ↗](#)

User Dashboard – REST-driven directory with pagination, search, and loading states. [live ↗](#)

Students Profile – Performance tracker with sortable tables and filters. [live ↗](#)
